

# THE PARK & REC TRADES Company Spotlight

## MODULAR PUBLIC USE BUILDINGS DESIGNED TO WORK WITH-IN THE ENVIRONMENT

Since 1967, Hunter Knepshield has provided quality services and competitive pricing to the parks and recreation industry with a complete range of modular public use buildings for parks and sporting venues. Standard or custom designed modular buildings for restrooms, concessions, shower, laundry, storage, shelter or combination structures are engineered to meet needs for functionality and low maintenance with fast installation. Manufactured in a quality-controlled factory environment with the latest construction techniques and tools, these facilities are delivered pre-wired, pre-plumbed and complete with an integral flooring system...ready for final hook-up.

### The Modular Advantage

Reduce the time it takes to get your building up and running. In addition to faster completion versus site-built facilities, Hunter Knepshield's "Modular Advantage" benefits include:

- Minimal site disturbance
- Reduced maintenance
- ADA Code Compliance
- Sanitary
- Arrive operational
- Require limited on-site construction
- Relocatable

### Designed To Work Within The Environment

Hunter Knepshield's modular facilities are not only functional and durable, but they're also designed to work within the environment. Architecturally attractive with exterior materials that complement the environment, Hunter Knepshield buildings can blend in with the surroundings or make a statement with flair to create a memorable landmark. Inside, the Hunter Knepshield facilities are designed for easy maintenance with graffiti-resistant materials and many choices of electrical, water and waste systems depending on the available site resources.

### Modular Restrooms

The Hunter Knepshield line of modular restroom facilities includes solutions for virtually any situation with fast turnaround and simple site preparation. Pre-manufactured for economy and ease of installation, the buildings are pre-plumbed, pre-wired, and shipped complete - ready for placement. Interiors are designed for low maintenance including wall-to-wall, floor-to-ceiling reinforced fiberglass for easy washdown. Vaulted ceilings in tongue and groove wood create an open and airy, non-threatening environment. A variety of plumbing choices are available to match on-site resources including composting toilets for remote sites. Solar power is also available.

### ADA Compliance Made Easy

Hunter Knepshield's modular restroom facilities are ADA-compliant and are a cost-efficient and time-saving solution to upgrading older facilities. With about 50% of non-compliant facilities completely replaced due to the increasing costs of bringing them into compliance with ADA regulations, establishing compliance may not be as obvious as it would seem. Hunter-Knepshield can provide

new, maintenance-friendly, ADA-compliant, pre-manufactured facilities to help meet ADA regulations...often at a lower cost than establishing compliance of an older facility. Call the Hunter Knepshield experts to find answers to your ADA compliance questions.

Hunter Knepshield's website at [www.hunterknepshield.com](http://www.hunterknepshield.com) features specifications, photos of recent projects, and an easy to use interface to showcase their modular facilities.
